

Agron 310 Work Experience: Students are required to complete the equivalent of 6 months of full-time work experience for the Agronomy program. This is most often met with two summer internships, but can be met with one 6-month work experience or at least 12 months of part-time work. Please note that this work must be related to agronomy or your intended career and must have been completed after you started at Iowa State. You cannot receive credit exclusively for working on your family farm or business.

Students will be required to complete reflection questions below for the work experience(s) and submit the responses to their advisor.

Reflection questions:

- When did you participate in the work experience?
- Name of your employer and organization:
- List your job responsibilities, i.e. the three bullets you are adding to your resume.
- Describe three things that you did in this position that added clarity to something that you had studied in your classes at ISU.
- Describe three new things you learned while participating in this work experience.
- Describe some topics/skills that you realized that you still need to learn more about/get more experience in, while participating in this work experience.
- Describe how this work experience helped you prepare for your future career.
